OUR SERVICES

01 ELECTRICAL SYSTEM INSTALLATION

02 ELECTRICAL MAINTENANCE AND EMERGENCY RESPONSE

03 LOW/MEDIUM VOLTAGE ELECTRICAL PANELS

04 PACKAGING AND LOGISTICS MACHINES

05 CONTROL AND SUPERVISION SYSTEMS

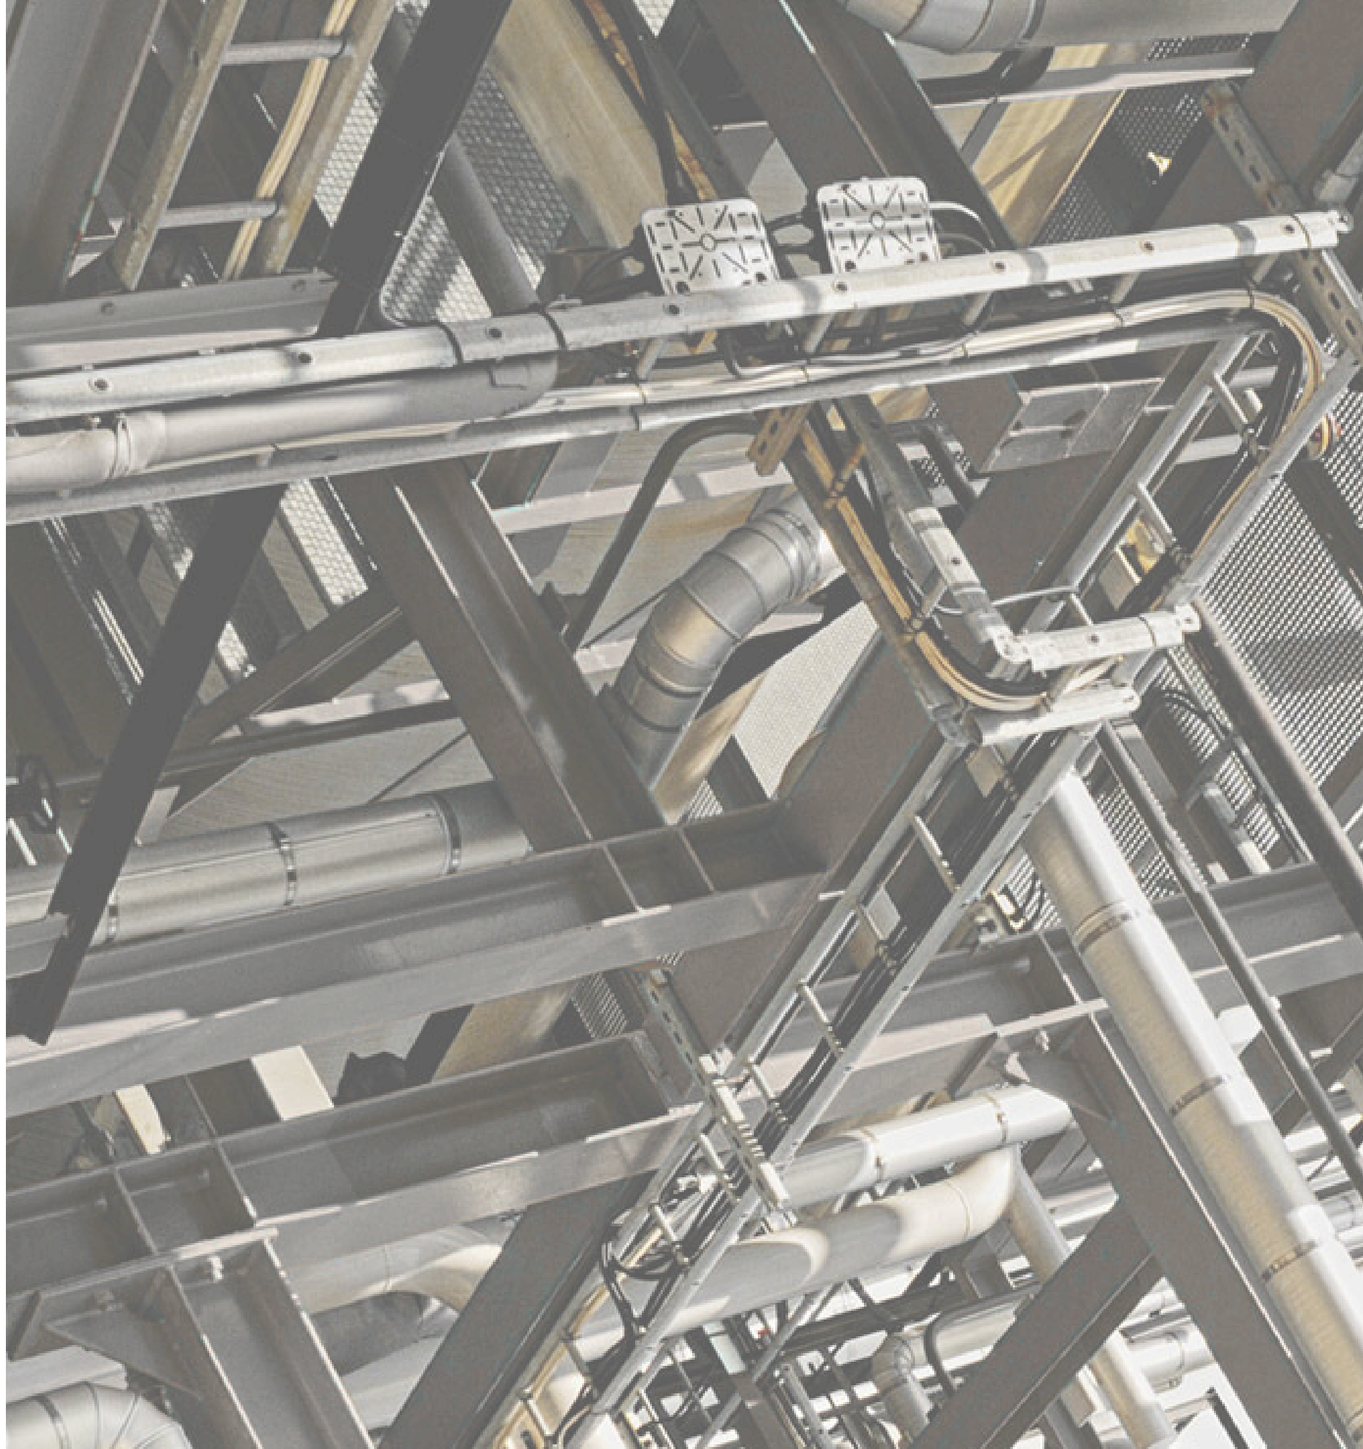
06 INDUSTRIAL AUTOMATION

07 AUTOMATION MANAGEMENT SOFTWARE

08 INSTALLATION OF DETECTION AND PROTECTION SYSTEMS

LOW/MEDIUM VOLTAGE ELECTRICAL SYSTEMS

Industrial plant engineering has been a key sector of the company's history since its inception, and today EMAC IMPIANTI SRLS is one of the most experienced companies in the sector, having never wasted its energy on other civil engineering activities.



Our company offers the advantage of understanding the **individual needs of the customer** and satisfying them as quickly as possible, acting as a true partner.

Our goal is **customer satisfaction** through a comprehensive service, from design to installation to final assistance.

Our production is aimed primarily at the **national and European markets** but also reaches **Arab countries** and **Eastern countries.**

Thanks to the experience gained directly in the field and the expertise of a constantly updated and specialized staff, EMAC IMPIANTI SRLS has been able to achieve an excellent organization that guarantees **rapid and efficient solutions** to any need of a varied clientele.

This allows us to provide high-quality industrial electrical systems, carefully overseeing each type of system, from the preliminary phase to design, construction, and maintenance. This ensures the efficient maintenance of industrial electrical systems, security, surveillance, fire prevention, and energy savings applied to industrial lighting.

LOW/MEDIUM VOLTAGE ELECTRICAL PANELS

EMAC IMPIANTI SRLS, assembles each individual electrical panel in-house to ensure continuous monitoring of the entire production process, both in terms of quality and compliance with delivery deadlines.

We manufacture a wide range of electrical panels, of any size and application, to meet every customer need.

The quality of the products is guaranteed by the **Testing Procedures** of the assembled electrical panels.

For all our products, we offer **after-sales assistance**, with rapid interventions by our specialized technicians at our customers' premises.

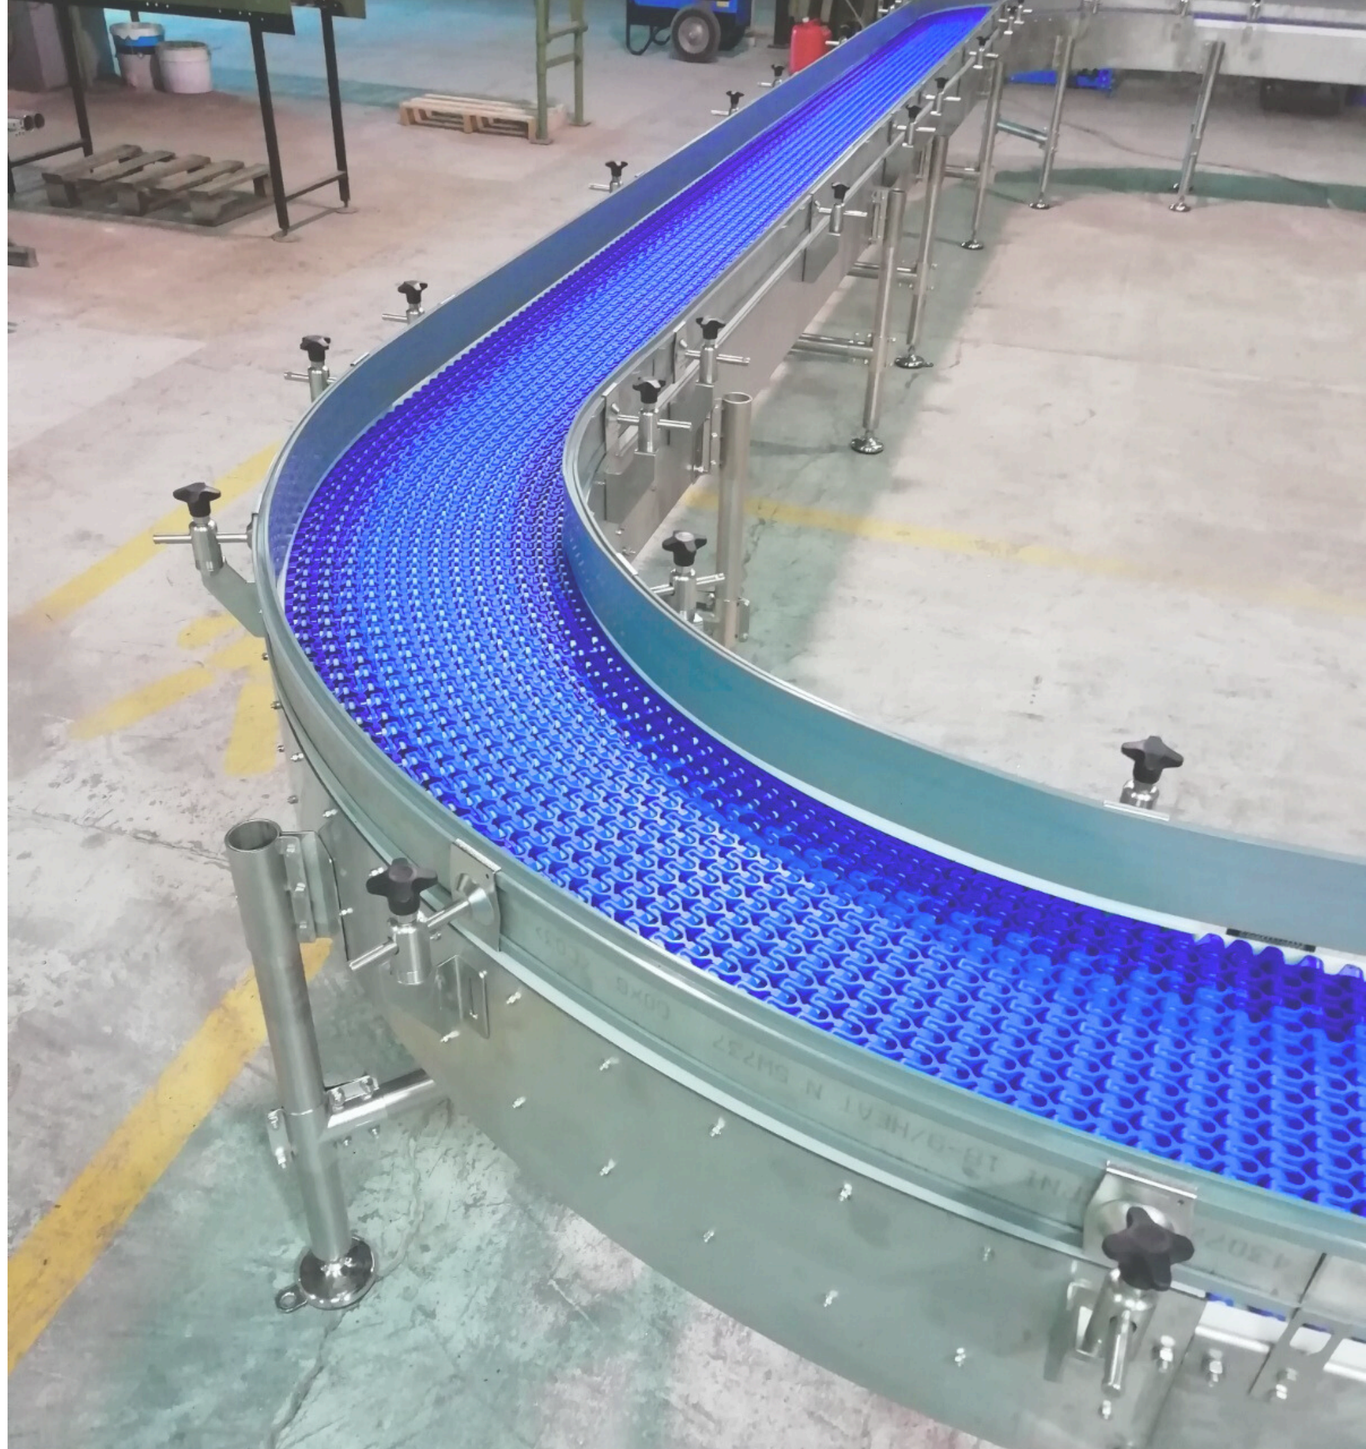
We perform **electrical and functional tests** by dedicated test technicians, following testing procedures according to current standards.

PACKAGING AND LOGISTICS MACHINES

EMAC IMPIANTI SRLS transforms and carries out operations on a wide range of conveyor and roller belts for manufacturing processes, modular belts, and PVC-coated rubber-sponge belts.

Thanks to a wide range of solutions, the professionalism of our technicians, and an in-depth knowledge of various production issues, we can recommend the most suitable type of tape based on your specific production needs.

The conditions for using conveyor belts are numerous and almost always different. To help you choose the most suitable material for your applications, you can rely on the **experience** and **expertise** of EMAC IMPIANTI SRLS.

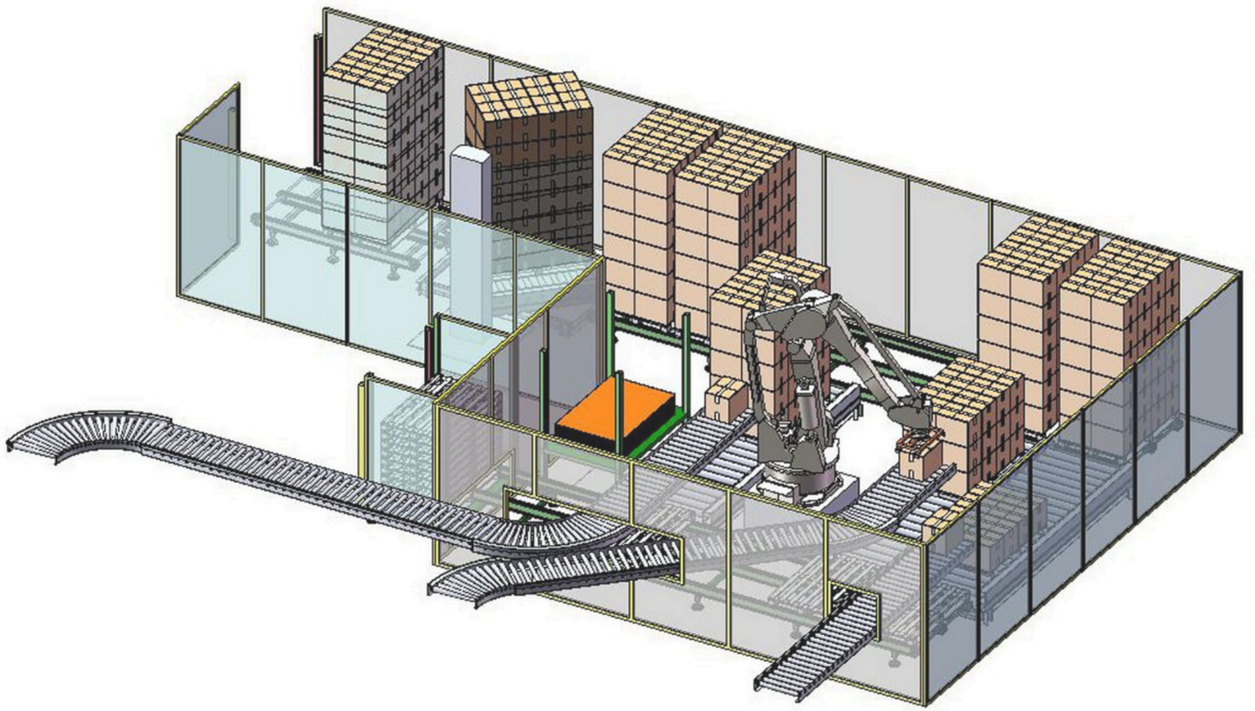


End-of-line systems are the appendix of the production line where the packaging, identification, and possible palletization phases of goods ready for shipping or storage are completed.

EMAC IMPIANTI SRLS **works with clients** to develop the most suitable end-of-line solution for their needs, in terms of technological requirements, production rates, layout, and information integration with the company's management system. Over the years, it has developed **strong partnerships** with manufacturers of specific packaging machines, allowing them to seamlessly integrate into its own systems. Furthermore, it manufactures special machines in-house, **custom-designed to meet specific needs.**

INDUSTRIAL AUTOMATION

Our expertise enables us to address a wide range of automation requirements. We design machines and systems, employing innovative, technologically advanced solutions and utilizing high-quality materials to ensure exceptional reliability.
Design, continuous research, and a team of experts ensure the utmost quality and reliability of our products.
Cutting-edge equipment enables EMAC IMPIANTI SRLS to manufacture versatile, high-quality products.



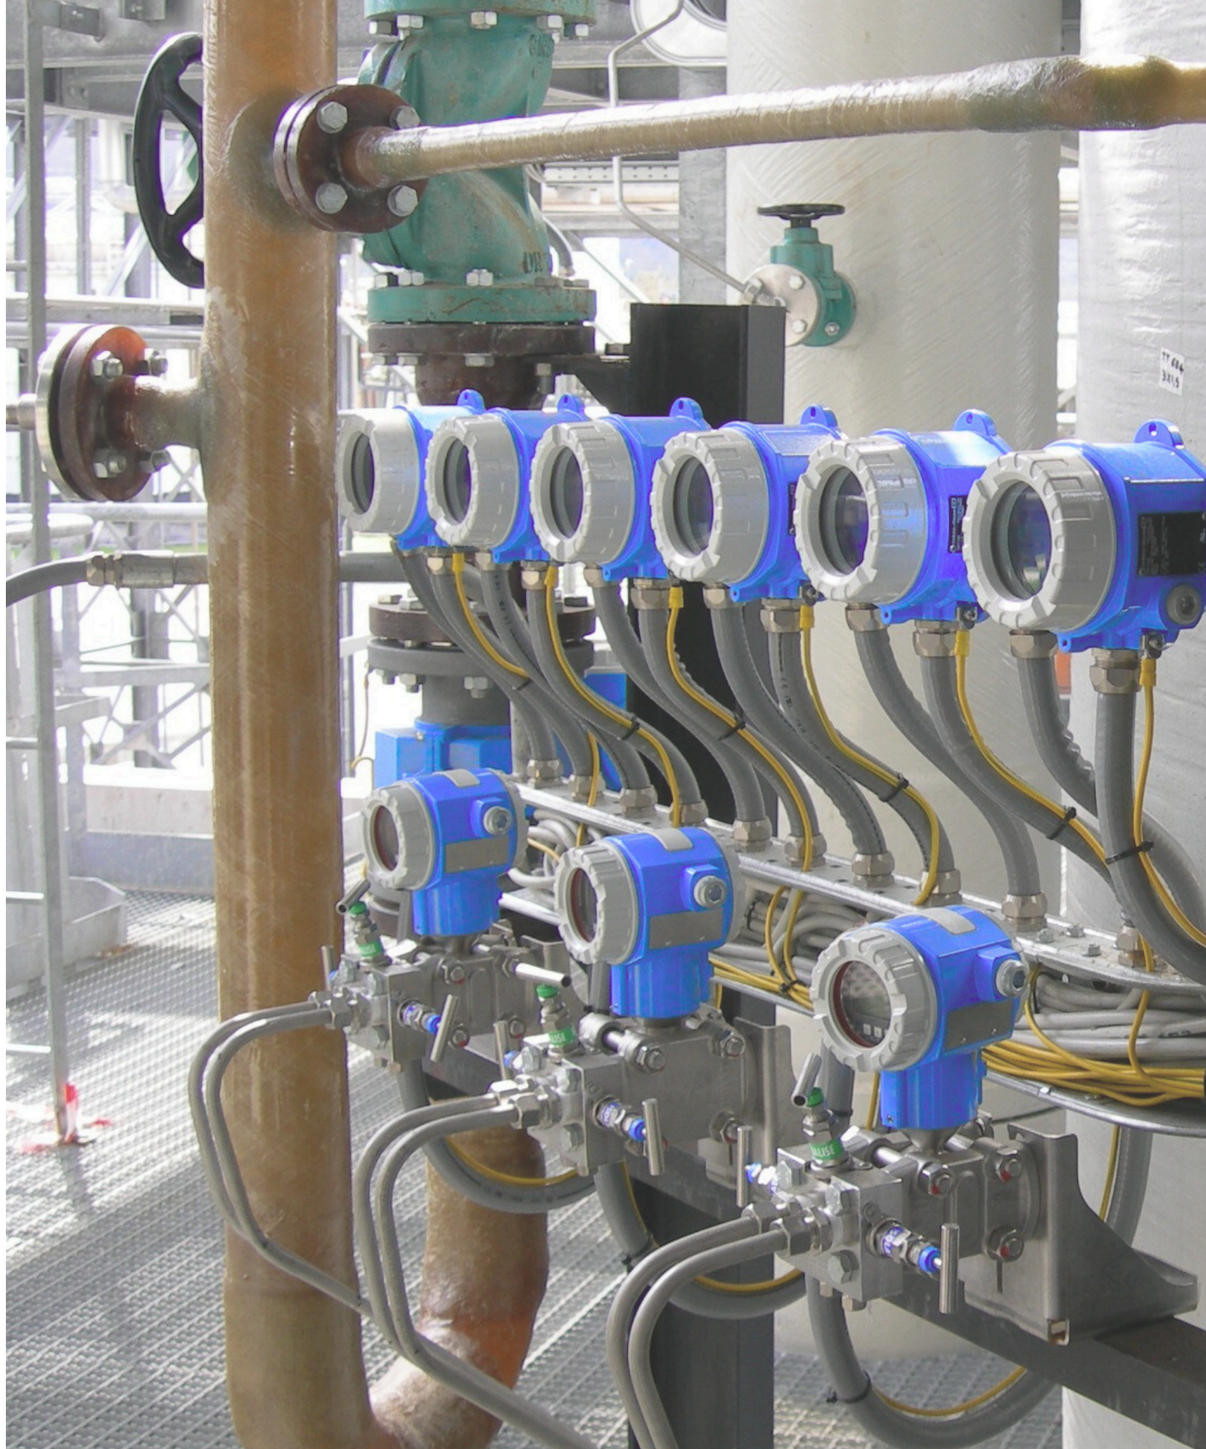
From Machinery to Software:

At the final level, management software must consider processes and information while evaluating their performance against established objectives and allocated resources.

A sophisticated undertaking that must be customized to meet the company's requirements. We construct control panels for automated machinery utilizing hardware and software from premier brands such as Siemens, Omron, Schneider, and others.

INSTRUMENTAL AND TECHNOLOGICAL SYSTEMS

EMAC IMPIANTI SRLS specializes in the creation of instrumental and technological electrical systems tailored to meet the diverse needs of clients, offering a range of comprehensive solutions to various challenges, with a focus on the design of such systems across Italy.



Over time, it has gained substantial experience and, by consistently adapting to emerging technologies and regulations, now provides a service that adheres to the highest technical and quality standards.

We are capable of developing systems for various environments and sectors, with a particular focus on the industrial sector.
